- ○ Structure and sink in AISI 304 stainless steel.
- (E) Soap holder diameter 95 x height 146 in AISI 304 (model available also without)
- (F) Pedal mixer – chromed brass mixing valve, provided with lever (stainless steel tube), connections 3/8"

#### How to use the pedal

- Light pressure on it releases only cold water
- Stronger pressure progressively releases warmer water
- At maximum pressure only hot water is released
- (G) Plate to fix it on the wall in Aisi304 2mm thick
- (H) Moplen siphon with overflow and plug; handle with stainless steel 18/10 plate
- (L) Revolving sink barrel
- (M) Flexible tube aisi 304 diameter 14

- Sink provided with all accessories (F-H) to assemble
- Sink provided with all accessories (E-L-M) already assembled
- Screwing material to fix on the wall not included

#### Assembling

- Fix the stainless steel pedal in the dedicated location as in the drawing.
- Assemble siphon and drain.
- Connect cold and hot water to the mixing valve.
